

No. of Functional Features Included in the Solution

Date	7 July 2026
Team ID	
Project Name	Personal Network Assistant
Maximum Marks	5 Marks

Functional Features Overview:

This document lists the functional features included in the Personal Network Assistant solution. Each feature is described with its purpose, implementation status, and marks contribution.

S.No	Feature Name	Feature Description	Module / Component	Status	Marks Contribution
1	User registration and login	Register users, validate credentials, hash passwords, and issue bearer tokens.	app/routes/auth.py, app/auth.py	Done	0.7
2	User profile management	Save role, industry, and networking goal for personalization.	app/services/profile_service.py, /profile	Done	0.5
3	Networking event analysis	Extract up to three event themes using local DistilBERT zero-shot classification.	app/services/event_analyzer.py	Done	0.6
4	Personalized conversation generation	Generate tailored starters from event themes, interests, tone, and profile context.	app/services/topic_generator.py	Done	0.8
5	Tone selection and confidence scoring	Support formal/casual/witty tones and score suggestions with explanations.	ConversationRequest, scorer.py	Done	0.6
6	Fact checking	Return a short Wikipedia summary for a user topic with fallback handling.	app/services/fact_checker.py	Done	0.5
7	Conversation history	Persist and retrieve recent generated conversations per authenticated user.	history_logger.py, /history	Done	0.6
8	Feedback submission and analytics	Store like/dislike feedback and expose recent feedback history.	feedback_logger.py, /feedback-history	Done	0.7

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6: auth, profile, event analysis, conversation generation, fact checking, history
Additional / Nice-to-Have Features	2: tone/confidence scoring and feedback analytics
Features Tested & Verified	8 feature areas have automated tests or route/service coverage

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	4	Login/register, profile page, fact-check page, history/feedback pages
2	Backend / Logic	5	Theme extraction, generation, scoring, fact checking, error handling
3	Database / Storage	3	Users, conversation history, feedback, profile fields
4	API / Integration	4	FastAPI routes, Gemini API, Wikipedia API, Streamlit-to-backend calls
5	Security / Authentication	3	JWT bearer tokens, bcrypt passwords, protected routes, rate limiting
